Material

9070: transparent or batch-dyed polycarbonate

9072: ABS chromed with galvanic coating

9074: ABS plated with 24K gold with galvanic coating

9076: batch-dyed polycarbonate

This lamp is also available in the 110 Volt version, following cUL and PSE certifications.

The revisiting of a classic: the baroque table lamp. The revolutionary feature of this lamp is that it is made entirely of transparent or batch-dyed polycarbonate. On the one hand, it is classical, rich and traditional, and on the other, it is innovative, transparent and ironic. The baroque style base is composed of three decorated layers that interconnect, and the large lampshade is made with a plissé effect, to create a myriad play of reflections once the lamp is turned on. Thanks to a special coupling system on the lampshade, it can be assembled at three different heights: 27, 29 and 31 inches. You can choose to assemble it at the height you prefer and, later, modify it according to your preferred use. In this way, Bourgie provides greater functionality, giving the user the possibility to transform it instantly into a splendid decorative table or desk lamp.
