

Form Piero Lissoni

Form is ideal for both home and business use, such as in waiting rooms or hotel reception areas. The basic element of the Form series is a seat which is both spacious and of ergonomic design, formed by a sheet of semi-structural polyurethane and lying on a light, chromed steel structure. It has a wide and comfortable seat, whose outline shows the result of meticulous research into the thickness of the material. This research has enabled a reduction in thickness to only 3 cm, without compromising solidity, resistance and flexibility. The series can be overlapped by placing the armchairs side by side and hooking them together freely to form long benches. An integral part of the article are the side-tables in polyester-lacquered MDF, which are meant to be suspended between two chairs.
