

Plastics

Piero Lissoni

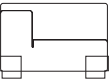

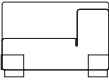

Plastics is a system of modular seating whose simple and linear elements can stand alone or in different combinations, giving life to innumerable possibilities. The transparent polycarbonate base and the use of rubberised technical fabrics combine aesthetic innovation and functionality and make Plastics youthful and trendy, elegant and refined. Plastics is formed by four base elements which offer maximum freedom:

Pouf is a cushion in soft polyurethane. The minimal lines of the pouf are enhanced by the four transparent polycarbonate feet.

Armchair uses the same materials and finishes and is produced in three different models: seat with backrest, with right armrest or with left armrest. Just as for the pouf, the supporting base is composed of four feet made of transparent polycarbonate.

For contract orders it is possible to arrange for personalized compositions with Kvadrat® fabric- Linea Prato Plain. In this case, the minimum order is for 12 items, quotations given on request.
